Product Description

Sapore Fidelio is a deactivated liquid wheat sourdough.

Usage Information

Usage rate / Recipe

Application	% on flour	Advantages
Wheat breads (French or Italian breads)	2%	Slight sourdough flavor
San Francisco breads	10-12%	Typical San Francisco Flavor
Viennoiseries, brioches	1.5%	Enhance buttery flavor

Application / Method

Sapore Fidelio is produced under controlled conditions and using a culture of selected sourdough micro-organisms. Since Sapore Fidelio is kept in a liquid form, Sapore Fidelio has a very round acid, full flavored taste profile.

Depending on the level of addition, Sapore Fidelio can perform various functions which range from slight flavor "lifting" in white or whole grain loaves up to full-flavor, no-time San Francisco sourdough bread production at 10-12%. The use of strong flour is recommended. The retarded method achieves the traditional Californian sourdough bread aspect: unique blistered, colored and "crusty" crust; crumb elasticity and texture; prolonged freshness.

A further application is to compensate for the loss of flavor in par-baked and frozen goods.

Nutritional Information

Average per 100 g

Note: The nutrient information provided by Puratos Corporation is based upon the USDA database and other sources, including suppliers' data sheets. All these are reliable sources; consequently the correlation between the calculated values and the lab analyses is normally excellent. However, there is no guarantee that the nutrient values provided by Puratos Corporation will match the analytical results. These values should be confirmed by actual analysis, whenever required by existing regulations.
